DETAILED ACTION

Election/Restrictions

The claims disclose 8 patently distinct species with respect to the jet injector including:

Species I: Figures 1-4

Species II: Figure 5-6

Species III: Figure 7-8

Species IV: Figure 9

Species V: Figure 10

Species VI: Figure 11

Species VII: Figure 12

Species VIII: Figure 13

The differences can be found by the 8 different embodiments pointed out by the drawings and the brief description of the drawings with respect to their corresponding descriptions in the specification. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

Also applicant's election with traverse of Claims 26-50 & 55 in the reply filed on 9/25/06 is acknowledged. The traversal is on the ground(s) that the restriction is untimely and improper since the previous examination of the claims. This is not found persuasive because the examination of the claims would require new search and consideration by the examiner since it is not the same examiner of record for the previous office action. Also the requirement for searching all of the claims is deemed to be a serious burden upon the examiner since the claims are that of a jet injector and that of producing a jet injector which requires a different search, which was not previously performed by the instant examiner. Last of all, the previous examiner, also incorrectly examined the wrong set of claims of 1-25 and therefore never fully examined the claims 26-55 at hand for every limitation. Therefore, the requirement is still deemed proper and is therefore made FINAL.

Information Disclosure Statement

The information disclosure statement filed 12/8/03 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other
